Project Report

Name: Enes Bera Engel
Course: SWE 573
Date:02/01/2024
Project name: SomeMore recipe project
Git Repository:
https://github.com/EnesEngel/SWE573/tree/main
Git tag version:v 0.2

HONOR CODE

Related to the submission of all the project deliverables for the Swe573 2022 Fall semester project reported in this report, I Enes Bera Engel declare that:
- I am a student in the Software Engineering MS program at Bogazici University and am registered for Swe573 course during the Fall 2023 semester.
- All the material that I am submitting related to my project (including but not limited to the

project repository, the final project report, and supplementary documents)
have been exclusively prepared by myself.
- I have prepared this material individually without the assistance of anyone else
with the exception of permitted peer assistance which I have explicitly disclosed in
this report.
For the peer assistance I thank my peers:
Ahmedreza Samiei, Hakan Aköz and Sadık Kuzu

For the website itself I have a local user in my local db.
Username: enes
Password: 712GeE84.

Project Details:
A Recipe Sharing website with profiles.

Software Requirements Specification:

My Design Documents were drawn on paper and shown in class.

Status of my project: My Project is not deployed therefore all of my requirements are incomplete

Status of Deployment: My project was dockerized but then I implemented more and changed the project and with my lack of docker knowledge I didn't update my docker files.

System manual: to run this system you will need python version over 3.12.0 and django 5.0

User manual: after signing up you can login and create recipes and share them. Also you

can view other recipes other users shared.
